Title Association Analysis of Bivariate Survival Data Based on Copulas

Version 1.1

Author Takeshi Emura

Maintainer Takeshi Emura <takeshiemura@gmail.com>

Description Perform association analysis of bivariate survival data based on copula models.

Two different ways to estimate the association parameter in copula models are implemented.

A goodness-of-fit test for a given copula model is implemented.

See Emura, Lin and Wang (2010) <doi:10.1016/j.csda.2010.03.013> for details.

A more general reference for the copula-based analysis of bivariate survival data is

Description

Perform association analysis of bivariate survival data based on copula models. Two different ways to estimate the association parameter in copula models are implemented. A goodness-of-fit test for a given copula model is implemented. See Emura, Lin and Wang (2010) <doi:10.1016/j.csda.2010.03.013> for details. A more general reference for the analysis of bivariate survival data is Emura, Matsui, and Rondeau (2019).
